PROFESSIONAL EXPERIENCE

YVote | Remote

June 2024 - Current

Web Developer (Contract)

- Developed a site redesign from WordPress to Next.js, using WordPress as the backend via API calls.
- Implemented dynamic and static pages using TypeScript and React, including a news and events page that fetched content from WordPress and Mailchimp.
- Created a filter for news and events page, enabling dynamic updates based on user interaction.
- Collaborated with the project manager and designer to ensure alignment with design specs and project progress.
- Enhanced site SEO by updating Metadata, OpenGraph content and generating a sitemap.
- Deployed the site using Vercel, managed domain rerouting, SSL certificates, and subdomain via Namecheap.
- Managed the GitHub project repository, facilitating version control and team collaboration.

Bandcamp | Remote

June 2023 - October 2023

Full Stack Software Engineer

- Improved XML chart reports, adding UPC code support and region-wise sales calculation using MySQL and Ruby.
- Enhanced AUS & NZ merchandise reporting by revamping MySQL queries for merch item charts.
- Wrote back-end unit tests using Minitest library in Ruby, resulting in more efficient validation for shipping rates.
- Resolved tickets from UI bugs to database anomalies that resolved migration issues for 100,000+ band accounts.
- Collaborated with cross functional team involving engineering, design, and logistics.
- Participated in code reviews, providing insights for quality enhancement.

Florida International University | Miami, FL

October 2021 - May 2023

Student Web Developer

- Directed creation and design of three websites tailored to requirements of FIU.
- Managed Content and design updates for Break Through Tech FIU.
- Utilized Google Analytics and Google ReCAPTCHA to provide security and analytics.
- Primarily employed WordPress for the development and management of all websites.

Bandcamp | Remote

June 2022 - August 2022

Software Engineer Intern

- Developed a service-oriented web application, made to showcase active vinyl campaigns and their states.
- Utilized Ruby Ramaze Framework and HTML with liquid and CSS/Sass to design a responsive, localized site.
- Implemented JavaScript event handling to dynamically update page content through API requests.
- Constructed a secure, back-end token-based RESTful API in Ruby, enabling precise data retrieval for users.
- Extracted data from MySQL, mapped to Ruby structs, and converted to JSON for front-end display.
